The Mighty Cash series of games is part of a popular wave of titles that follow the Lightning Link model. 8 In this case, it's also made by Aristocrat studio Gimmie Games, and as a game mechanic been embedded in a 8 more diverse variety of games than most of the other games of this type.

We'll take a look at the standard 8 Mighty Cash game

format, how bets work, and help you understand the options. Things can differ a bit from game 8 to game, but the core ideas tend to be similar.

Like our conversation about

Dancing Drums, the betting options allow for 8 a surprising depth that give you control over what type of game you wish to play.

Betting options

The Mighty Cash bet 8 panel has

a row for just the Mighty Cash bonus size, and a second that is a line multiplier that 8 also multiplies the Mighty Cash symbols (and the numerical values inside them).

The

betting panel on Mighty Cash has two sets 8 of choices within a given denomination (most Mighty Cash machines are configured to be multi-denomination). The top row relates directly 8 to the money symbols. There are five choices, with higher bets in this activating larger numbers on the money symbols. 8 This is effectively a bonus bet – how much you wish to choose to invest in the Mighty Cash bonus 8 opportunity.

The bottom row

is your bet multiplier, which will multiply both line hits and the numbers that the Mighty Cash 8 money symbols can house. All bets, no matter what choices on the top and bottom panel, make you eligible for 8 all progressives, and for the Mlghty Cash bonus. But the choices you make can amp up the Mighty Cash bonus, 8 the line hits or somewhere in between.

Similar to games like Dancing Drums, amping up the bet on the Mighty Cash

8 bonus is generally a volatility play as you're putting a disproportionate weight on a bonus. That said, Mighty Cash line 8 hit chasing can be pretty volatile as well, so it's all about the experience you're seeking from the game.

The standard 8 Mighty Cash game

has five jackpots, with a Mini and Minor jackpot that is fixed, and a Major, Maxi and

8 Grand progressive jackpot. The jackpots may be linked across a bank of machines, or contained to individual machines.

### The Bonuses

The Mighty 8 Cash bonus works like many of the games with numerical values on the reel – collect more, win more. But 8 there's a couple of unique twists.

The Mighty Cash feature is the core bonus of any Mighty Cash game. When you 8 land the appropriate number of money symbols (or more), you will go into a respin mode that gives you a 8 set number of spins based on the number of symbols that initiated the bonus (6 money symbols give you 6 8 spins, 7 gives you 7 spins, etc.)

Unlike Lightning Link, where the Hold & Spin always requires six balls to initiate, 8 the Mighty Cash bonus can trigger with 5 money symbols on higher denomination options (for a penny machine this will 8 be the nickel and dime levels). This may impact the betting choices some make, since getting five symbols can seem 8 easier. But then you only get 5 respins.

All jackpots are available at any bet, and do not require a full 8 screen to win, another difference from Lightning Link. The Grand can land on a money symbol and as long as 8 you get enough symbols to trigger the bonus, or if it lands in the middle of a Mighty Cash bonus, 8 it's yours. If you manage to fill the board with symbols, you get double the payout (including all progressives except 8 the Grand, which is not doubled).

During a Know Your Slots group pull, participant Sheilah landed a full screen of Mighty 8 Cash symbols in the bonus.

Sometimes when you run out of spins, a second chance feature will give you 1-3 additional 8 spins, but this feature is not guaranteed.

Mighty Cash games generally have a free spins feature as well, with 8 spins 8 awarded to attempt to get some major wins. The Mighty Cash bonus can land during the bonus round as well.

The 8 game will sometimes "announce" that a bonus or big line hit is coming with an animation informed by the theme 8 of the game.

See the Game in Action

Brian Christopher recently landed the Grand progressive jackpot while betting the minimum bet on 8 nickels. His final outcome was 9000x his bet – insane! Check out the video:

Blackjack is played with 8 decks of 52 standard cards throughout this casino, unless otherwise indicated. The cards are dealt face up, one to each player and then one to the Dealer followed by a second card to each player. Aces count as 1 or 11, Court cards count as 10 and all other cards have their face value.

In most large casinos, you'll find blackjack available in 1, 4, and 8-deck varieties. Sometimes you'll find 2-deck and 6-deck games, but they're less common. 1-deck tables usually shuffle by hand. 4-deck tables and up usually shuffle by machine.
