A Texas hold 'em match in progress. Hold 'em is a popular form of poker in the USA.

Poker is a 9 game which people play with a normal set (or deck) of 52 cards. Poker is a gambling game which involves 9 some luck, but also some skill. In poker, players make bets against each other depending on the value of their 9 poker hand. Bets are usually made with plastic or ceramic discs called chips. Bets may also be made with coins 9 or cash, but chips are more often used because they are easier to handle and count. At the end of 9 the game, players may swap their chips for money. If the players are not playing for real money, the chips 9 are counted at the end of the game to determine the order of winners.

There are many different kinds of poker. 9 In draw poker, each player is dealt five cards. A player can decide to throw away a number of these 9 cards and then take (draw) new cards to replace them.

In stud poker (for example, seven-card stud), some of each player's 9 cards are laid (face-up) on the table so that the other players can see them. In community card poker (for 9 example, Texas hold 'em), players share some of their cards in the center of the table.[1]

The history of poker

is 9 a matter of some debate. The name of the game likely descended from the French poque, which descended from the 9 German pochen ('to knock'), but it is not clear whether the origins of poker itself lie with the games bearing 9 those names. It closely resembles the Persian game of as nas, and may have been taught to French settlers in 9 New Orleans by Persian sailors. It is commonly regarded as sharing ancestry with the Renaissance game of primero and the 9 French brelan. The English game brag (earlier bragg) clearly descended from brelan and incorporated bluffing (though the concept was known 9 in other games by that time). It is quite possible that all of these earlier games influenced the development of 9 poker as it exists now.

English actor Joseph

Crowell reported that the game was played in New Orleans in 1829, with 9 a deck of 20 cards, four players betting on which player's hand was the most valuable. Jonathan H. Green's book, 9 An Exposure of the Arts and Miseries of Gambling (G. B. Zieber, Philadelphia, 1843), described the spread of the game 9 from there to the rest of the

country by Mississippi riverboats, on which gambling was a common pastime.

Soon after

this 9 spread, the full 52-card English deck was used, and the flush was introduced.

During the American Civil War, many additions 9 were made, including draw poker, stud poker (the five-card variant), and the straight. Further American developments followed, such as the 9 wild card (around 1875), lowball and split-pot poker (around 1900), and community card poker games (around 1925). Spread of the 9 game to other countries, particularly in Asia, is often attributed to the U.S. military.

The game and

jargon of poker have 9 become important parts of American culture and English culture.

Such phrases as ace in the hole, beats me, blue chip, 9 call the bluff, cash in, pass the buck, poker face, stack up, up the ante, when the chips are down, 9 wild card, and others are used in everyday conversation even by those unaware of their origins at the poker table.

Modern 9 tournament play became popular in American casinos after the World Series of Poker began in 1970. It was also during 9 that decade that the first serious strategy books appeared, notably *The Theory of Poker* by David Sklansky (ISBN 1880685000), *Super 9 System* by Doyle Brunson ( ISBN 1580420818), and *The Book of Tells* by Mike Caro ( ISBN 0897461002).

Poker became more 9 popular early in the 21st century, largely due to the introduction of online poker and the invention of the hole-card 9 camera which finally turned the game into a spectator sport. Viewers could now follow the action and drama of the 9 game, and broadcasts of poker tournaments such as the World Series of Poker and the World Poker Tour brought in 9 large television audiences.

Game play [ change | change

source ]

Royal Flush in hearts

The game of poker is played in hundreds 9 of variations, but the following overview of game play applies to most of them.

Depending on the game

rules, one or 9 more players may be required to place an initial amount of money into the pot before the cards are dealt. 9 These are called forced bets and come in three forms: antes, blinds, and bring-ins.

Like most card games, the dealer shuffles 9 the deck of cards. The deck is then cut, and the appropriate number of cards are dealt face-down to the 9 players. In a casino a "house" dealer handles the cards for each hand, but a button (any small item used 9 as a marker, also called a buck) is rotated among the players to determine the order of dealing and betting 9 in certain games. In a home game, the right to deal the cards typically rotates among the players clockwise, but 9 a button may still be used.

After the initial deal, the first of what may be several betting rounds begins. Between 9 rounds, the players' hands develop in some way, often by being dealt additional cards or replacing cards previously dealt. During 9 a round of betting, there will always be a current bet amount, which is the total amount of money bet 9 in this round by the player who bet last in this round. To keep better track of this, it is 9 conventional for players to not place their bets directly into the pot (called splashing the pot), but rather place them 9 in front of themselves toward the pot, until the betting round is over. When the round is over, the bets 9 are then gathered into the pot.

After the first betting round is completed (every participating player having called an equal amount), 9 there may be more rounds in which more cards are dealt in various ways, followed by further rounds of betting 9 (into the same central pot). At any time during the first or subsequent betting rounds, if one player makes a 9 bet and all

other players fold, the deal ends immediately, the single remaining player is awarded the pot, no cards are shown, no more rounds are dealt, and the next deal begins. This is what makes it possible to bluff.

At the end of the last betting round, if more than one player remains, there is a showdown in which the players reveal their previously hidden cards and evaluate their hands. The player with the best hand according to the poker variant being played wins the pot.

The following are poker hands, from best to worst:

**Straight flush** : Five cards of the same suit in sequence (if those five are A, K, Q, J, 10; it is a Royal Flush )

**Flush** : Five cards of the same suit in sequence (if those five are A, K, Q, J, 10; it is a Royal Flush)  
**Four of a kind** : Four cards of the same rank and any one other card

**Full house** : Three cards of one rank and two of another

**Flush** : Three cards of one rank and two of another

**Flush** : Five cards of the same suit

**Straight** : Five cards in sequence (for example, 4, 5, 6, 7, 8)

**Three of a kind**: Three cards of the same rank

**Two pair**: Two cards of one rank and two cards of another

**Two pair**: Two cards of one rank and two

cards of another  
**One pair**: Two cards of the same rank

Two cards of the same rank

**High card**: If no one has a pair, the highest card wins

Poker chips [ [change](#) | [change source](#) ]

Poker chips are small discs. They are made by various materials including molded plastic, colored metal, molded clays. They are used in table games as play money. Modern poker traces its roots towards the 1800s, and in those days, players used what you could to help keep a tally. Coins, gold dust and nuggets were used until they considered replacing with something which would indicate them. Thus, the casino chips happen to be introduced within the gambling business.

Poker rooms started using casino chips to simply manage the cash and then collect charges. In those days, casino chips were created of ivory, bone, paper, wood. However, the most generally used chips were created of composite clay. One problem made an appearance due to the developing casino chips which was cheating. Some players considered sneaking some chips in their hands. To avoid this, manufacturers created differentiated disks. Consequently, a range of styles was created. With time, other manufacturers could use many other materials for making casino chips, for example, plastic and metal.[2]

### **Mulheres podem ser mais resistentes ao estresse do voo espacial do que homens, segundo estudo**

Quando se trata de enfrentar alienígenas 0 que gotejam ácido, uma máquina não testada que viaja através de buracos de minhoca ou uma estação espacial quebrada por 0 detritos voadores, é a astronauta feminina durona que se levanta para salvar o dia.

E talvez Hollywood esteja no caminho certo. 0 Um grande estudo sobre o impacto do voo espacial sugere que as mulheres podem ser mais resilientes do que os 0 homens ao estresse do espaço e se recuperam mais rapidamente quando retornam à Terra.

Os achados são preliminares, não least porque 0 poucas astronautas femininas foram estudadas, mas se a tendência for confirmada, isso poderá ser importante para programas de recuperação de 0 astronautas e para a seleção de tripulações para missões futuras à Lua e além.

"Os homens parecem ser mais afetados pelo 0 voo espacial para quase todos os tipos de células e métricas", escrevem os cientistas sportingbet om um artigo da Nature Communications 0 que examina os efeitos do voo espacial no sistema imune humano.

Liderados por Christopher Mason, um professor de fisiologia na Weill 0 Cornell Medicine sportingbet om Nova York, um time de pesquisadores examinou como o sistema imune reagiu ao voo espacial sportingbet om dois 0 homens e duas mulheres que voaram sportingbet om torno da Terra como civis na missão SpaceX Inspiration4 sportingbet om 2024 e compararam 0 os achados com dados de 64 outros astronautas.

O estudo mostrou que a atividade gênica foi mais desregulada sportingbet om homens do 0 que sportingbet om mulheres e levou mais tempo para retornar ao normal sportingbet om homens assim que retornaram à Terra firme. Uma 0 proteína afetada foi a fibrinogênio, que é crucial para a coagulação sanguínea.

"Os dados agregados até agora indicam que a resposta 0 regulatória gênica e imune ao voo espacial é mais sensível sportingbet om homens", escrevem os cientistas. "Mais estudos serão necessários para 0 confirmar essas tendências, mas tais resultados podem ter implicações para os tempos de recuperação e possivelmente a seleção de tripulações, 0 por exemplo, mais mulheres, para missões de alta altitude, lunares e de longa duração no espaço profundo."

Não está claro por 0 que as mulheres podem ser mais resilientes ao voo espacial do que os homens, mas Mason disse que a capacidade 0 de lidar com as demandas da gravidez pode ajudar.

"Ser capaz de tolerar grandes mudanças na fisiologia e dinâmica de fluidos 0 pode ser ótimo para gerenciar a gravidez, mas também para gerenciar o estresse do voo espacial ao nível fisiológico", disse.

O 0 artigo é um dos mais de uma dúzia publicados na terça-feira que analisam amostras da tripulação da missão Inspiration4 e 0 outros astronautas que passaram seis meses ou um ano na Estação Espacial Internacional.

As medições estabelecem as fundações para um banco 0 de dados de biologia espacial que será usado para reduzir os riscos à saúde de futuros astronautas que se dirigem 0 à Lua, órbita lunar

e, potencialmente, mesmo Marte.

A NASA quer voar humanos sportingbet om torno do planeta vermelho nos anos 2030, 0 mas outro estudo publicado na Nature Communications levanta sérias dúvidas sobre a segurança de tal missão de longa duração e 0 de longa distância.

O time internacional, liderado por pesquisadores da University College London, expôs camundongos a raios cósmicos simulados (GCRs) e 0 descobriu que a dose que os humanos podem encontrar sportingbet om uma missão de ida e volta a Marte pode causar 0 danos permanentes aos rins, com astronautas possivelmente precisando de diálise no retorno se não estiverem protegidos dos raios.
